PROFESSIONAL SUMMARY

Full-stack engineer with 15 years building production systems across PHP backends, AWS infrastructure, and Docker deployments. Deep PHP/Laravel expertise (13+ years) paired with daily hands-on AWS operations: EC2, RDS, S3, Lambda, ECS/Fargate, SQS, and SNS. Recently launched two SaaS products end-to-end in under 30 days each -- writing the code, modeling the schema, containerizing with Docker, configuring the cloud infra, and integrating payment gateways. Background in distributed microservices at scale, CI/CD delivery inside sprint cadences, and building systems built to run without babysitting. Comfortable moving across the stack and picking up new tooling fast. See live work: andersonsilva.dev

CORE COMPETENCIES

PHP & Laravel (13+ yrs)

AWS: EC2 · RDS · S3 · Lambda · ECS/Fargate

Docker Containerization

CI/CD Pipeline Design

Full-Stack Development

SQL · PostgreSQL · MySQL · SQL Server

React / Next.js · Node.js

Distributed Microservices

WORK EXPERIENCE

Logcomex

Jun 2020 -- Apr 2026

Expert Engineer

- Built and maintained **distributed PHP/Laravel microservices** processing millions of foreign trade records daily, with architecture designed for maintainability and high throughput.
- Implemented automated document reading via **OCR pipeline**, eliminating manual steps in customs clearance and increasing import/export flow accuracy.
- Designed event-driven **AWS infrastructure** using SQS and SNS for system decoupling; services containerized with Docker and deployed on **ECS/Fargate and Lambda** with zero-downtime releases.
- Contributed to shipping the supply chain platform from zero to first customers: writing features, reviewing PRs, and enforcing code quality at critical integration points.
- Maintained CI/CD workflows to support fast, reliable release trains aligned with **Agile sprint cadences**.

Meta

Jan 2020 -- Jun 2020

Senior Backend Developer

- Led migration of a legacy financial reconciliation system from **PHP to Python Serverless**, reducing infrastructure costs and improving reliability.
- Designed event-driven architecture on AWS using **Fargate and Lambda** for asynchronous processing, applying IAM policies and VPC configuration throughout.

Associacao Brasileira de Criadores de Girolando

Mar 2012 -- Oct 2019

Systems Analyst

- Led full-stack development of web systems (Laravel/CodeIgniter) and mobile apps (Java/Kotlin), owning the full delivery cycle from requirements to production.
- Managed Ubuntu server infrastructure and implemented complex business logic directly in **SQL Server via T-SQL and stored procedures**.

WebCorpore

Mar 2009 -- Jul 2011

Web Developer

- Built e-commerce and web systems remotely, establishing full-stack fundamentals in backend development, database design, and frontend delivery.

PROJECTS

Scribossauro Launched < 30 days scribossauro.com

AI-powered meeting transcription SaaS built end-to-end: PHP/Node.js backend, audio processing pipeline, LLM integration for insights, AWS infrastructure (Lambda, RDS, S3), Docker containerization, and Stripe payment integration. Full-cycle ownership from schema design to production deploy.

PHP · Node.js · AWS Lambda · RDS · S3 · Docker · LLMs · Stripe

Flowdesk.pro Launched < 30 days flowdesk.pro

Flow automation and management platform shipped from concept to production in under one month. Designed UX, built robust backend integrating multiple external APIs, and set up secure multi-service AWS infrastructure with Docker and automated deployments.

PHP · Node.js · AWS · Docker · PostgreSQL · REST APIs

EDUCATION

Systems Analysis and Development (ADS) — IFET 2011

SKILLS

Backend	PHP (Laravel, CodeIgniter · 13+ yrs), Node.js (Express, Next.js), TypeScript, Python
Frontend	React, Next.js, HTML/CSS
Cloud & Infra	AWS (EC2, VPC, IAM, S3, RDS, Lambda, ECS/Fargate, SQS, SNS, CloudWatch), Docker
CI/CD & DevOps	GitHub Actions, automated deployment pipelines, Docker-based containerization workflows
Databases	PostgreSQL, MySQL, SQL Server (T-SQL, Stored Procedures), RabbitMQ, AWS SQS
Testing	PHPUnit, TDD, integration testing
Languages	Portuguese (native), English (professional)
